DETAILED ACTION

1. Claims 1-19 are allowed over the art of record.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-18 recite, inter alia, a resistance measurement circuit or an integrated circuit test structure comprising: a plurality of resistor strings, wherein each resistor string is coupled in series with a respective one of the current sources and comprises a plurality of nodes with different resistances relative to a reference node, and wherein each node in each resistor string has a different resistance relative to the reference node than corresponding nodes in the other resistor strings.

Claim 19 recites, inter alia, a method comprising: sequentially comparing voltages on successive nodes in a first of the resistor strings to a reference voltage until a voltage on a selected one of the nodes crosses the reference voltage in a first direction; and comparing the voltage on the node corresponding to the selected node in successive ones of the resistor strings in the sequence to the reference voltage until the voltage on a selected one of the resistor strings crosses the reference voltage in a second direction, opposite to the first direction.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
